W 20040309

AB This invention relates to novel triple salts of (-)-hydroxycitric acid having the general formula 1 wherein X, Y are selected from zinc or group IIA metal and Z is selected from group IA metals of the Periodic Table. Preferred salts are triple metal salts of calcium, magnesium or zinc and potassium. This invention also includes a process for preparing the triple salts by adding stiochiometric amts. of aqueous solns. of the compds. of the desired metal to an aqueous solution of (-)-HCA. Preferably an extract from Garcinia fruit ring is used as a starting material. Compds. of this invention are substantially tasteless, odorless and highly water soluble and find use in beverages and in nutraceuticals.

PRIORITY APPLN. INFO.: WO 2004-IN56 W 20040309

AB This invention relates to novel triple salts of (-)-hydroxycitric acid having the general formula 1 wherein X, Y are selected from zinc or group IIA metal and Z is selected from group IA metals of the Periodic Table. Preferred salts are triple metal salts of calcium, magnesium or zinc and potassium. This invention also includes a process for preparing the triple salts by adding stiochiometric amts. of aqueous solns. of the compds. of the desired metal to an aqueous solution of (-)-HCA. Preferably an extract from Garcinia fruit ring is used as a starting material. Compds. of this invention are substantially tasteless, odorless and highly water soluble and find use in beverages and in neutraceuticals.
